PROFESSIONAL SUMMARY

Senior .NET Engineer with **5+ years** of experience architecting and delivering enterprise distributed systems for global brands including Unilever, JTI, A.O. Smith, Arla, AKG, and Lipton. Specialized in Clean Architecture, DDD, CQRS, and event-driven design on .NET, Angular, and Azure, with deep experience integrating SAP SD with sales, distribution, and HR platforms. Proven at scale: API response time cut from **1.2s to under 500ms**, batch processing reduced from **several hours to under 30 minutes**, and deployments automated through CI/CD. Provides technical leadership through architecture decisions, code reviews, and mentoring of 5 junior developers.

250K+ retail outlets | **6,000+** concurrent users | **200K+** daily transactions | **500+** distributors on one platform | **97%** fewer reconciliation errors

CORE SKILLS

- **Backend:** C#, .NET Framework, .NET 5+, ASP.NET Core, Web API, Entity Framework Core, LINQ, Dapper, MediatR, Async Programming
- **Frontend:** Angular v14+, TypeScript, JavaScript, jQuery, PrimeNG, Telerik/Kendo UI
- **Architecture:** Microservices, Event-Driven Architecture, Distributed Systems, Clean Architecture, Domain-Driven Design (DDD), CQRS, SOLID Principles, Design Patterns, System Design, Cloud-Native Development
- **Enterprise & ERP Integration:** SAP Sales and Distribution (SD), HRMS Systems, Distributor Management Systems (DMS), Field Force Automation, Claims & Returns Processing, API Design, RESTful APIs, XML Web Services, gRPC
- **Messaging & Databases:** RabbitMQ, Hangfire, Firebase, SQL Server (Performance Tuning, Indexing, Query Optimization), PostgreSQL, MongoDB, Redis
- **Cloud & DevOps:** Microsoft Azure (Functions, App Services, Storage, AKS), Azure DevOps, Docker, Kubernetes, CI/CD (GitHub Actions, Jenkins), Git, SVN
- **Security & Quality:** OAuth 2.0, JWT, API Security, Payment Gateway Integration (bKash, Nagad), xUnit, NUnit, Unit Testing, Integration Testing, Code Review
- **Leadership & Practice:** Agile, Scrum, SDLC, Sprint Planning, Architecture Decisions, Software Requirements Specification (SRS), Technical Documentation, Developer Mentoring, Technical Debt Reduction, RDLC, Crystal Reports, AI-Assisted Development (Claude, GitHub Copilot)

WORK EXPERIENCE

Senior Software Engineer — Computer Ease Limited | Dhaka, Bangladesh Sep 2023 – Present

- Architected high-throughput REST APIs integrating HRMS with DMS for Unilever DFF, enabling real-time sync across **500+ distributors** and reducing reconciliation errors by **97%**.
- Led design of Primary and Secondary Sales modules across 2 enterprise systems, streamlining order processing, inventory, and sales tracking for a **500+ distributor network**.
- Built a full-stack Technician Sales Module using .NET 10, Angular, Hangfire, and RabbitMQ, processing **200,000+ daily transactions** with zero data loss.
- Engineered Azure Functions to process multi-terabyte datasets, shrinking batch time from several hours to under 30 minutes — a **4× performance improvement**.
- Unified SAP SD systems with HRMS, Primary-to-Secondary Sales, and VAT platforms, improving data accuracy, process automation, and cross-system efficiency.
- Standardized REST APIs and XML Web Services across web, mobile, and desktop platforms, cutting new client integration time by **30%**.
- Optimized SQL Server queries and implemented strategic indexing, reducing average API response time from **1.2s to under 500ms** (over **2× faster**).
- Automated CI/CD pipelines via Azure DevOps and GitHub Actions, trimming manual deployment effort by **50%** and accelerating release frequency.
- Mentored 5 junior developers through code reviews, Clean Architecture training, and AI-assisted workflows using Claude and GitHub Copilot, cutting production incidents by nearly **one-third**.

.NET Developer — Synergy Interface Ltd | Dhaka, Bangladesh Jul 2021 – Aug 2023

- Streamlined full-cycle HR workflows — employee management, leave, payroll, and loans — saving **400+ hours annually**.
- Strengthened data validation for field agent submissions, driving down processing errors by **60%** and saving 8 hours of data team effort weekly.
- Delivered Job Sheet, Order Management, Customer Feedback, and Sale/Purchase Entry modules for an Automobile Garage ERP with real-time ledger and inventory synchronization (**100% accuracy**); customer satisfaction tracking improved by **40%**.
- Integrated bKash and Nagad payment gateways following PCI-DSS guidelines, extending digital payments to **65% of all transactions**.
- Designed and performance-tuned **150+** parameterized enterprise reports across HR, Payroll, POS, and Automobile ERP using RDLC, Crystal Reports, and SQL Server query optimization.

KEY PROJECTS

Online Sales and Distribution System | Clients: JTI, Arla, AKG, Lipton | Computer Ease Limited
.NET 8, ASP.NET Framework, Angular, SQL Server, Redis, Azure, RabbitMQ

- Transformed an offline DMS for Bangladesh's FMCG and Tobacco markets into a scalable, high-availability online platform serving **6,000+ concurrent users**.
- Structured 5 core backend modules — Orders, Sales, Promotion, Market Returns, and Inventory — and tuned SQL Server to cut challan processing from 2.5s to 700ms (**3.5× faster**).
- Established data archiving and warehousing strategies for long-term scalability and authored the SRS, architecture diagrams, and API contracts.

Doorbin & Lever Bazar — Retail Distribution Platforms | Client: Unilever | Computer Ease Limited
.NET, SQL Server 2019, REST Services, Firebase

- Scaled Doorbin, a Sales Representative management platform serving **6,000+ representatives** and **250,000+ retail outlets**, hardening Market Visit, Target Distribution, and Sales Order Tracking APIs for peak field-agent traffic.
- Introduced Lever Bazar, a B2B self-ordering platform with real-time Firebase synchronization across mobile and web clients, streamlining retailer enrollment and order placement.

Tertiary Sales Module — Pureit | Client: A.O. Smith | Computer Ease Limited
.NET 9, Angular 20, Redis, SQL Server, Azure App Service

- Launched a module for field agents to capture end-consumer orders, routing distributor approvals into automated Challan and Memo generation.
- Built an end-to-end distributor claims system (discount, damage, CLP) with a second authorization pass before invoicing, plus SMS/email notifications and real-time location tracking at delivery.

Field Order & SAP Integration Platform — AutoCrop Care | Client: AutoCrop | Computer Ease Limited
.NET, Hangfire, SAP Order APIs, SQL Server

- Rolled out a field Order App with real-time discount/FOC calculations, live GPS tracking, and multi-step order authorization; synchronized orders with SAP via Hangfire jobs, keeping product, pricing, and customer master data aligned in real time.
- Developed a demand-forecasting engine at territory, region, and area level, giving leadership forward visibility into expected order volumes.

PERSONAL PROJECTS

Mediato — MediatR-compatible Mediator Library for .NET

- Built a library with full feature parity with MediatR — pipeline behaviors, streaming, and publish strategies — as an alternative after MediatR's move to commercial licensing.

Ticket Booking Platform — Architecture Reference Project

- Modular-monolith reference with Identity and Events modules, SharedKernel primitives, Transactional Outbox, RedLock distributed locking, and EF Core + Dapper hybrid reads, demonstrating Clean Architecture, DDD, and CQRS.

EDUCATION

Southeast University — Dhaka, Bangladesh Jun 2017 – Jun 2022

Bachelor of Science in Computer Science and Engineering | CGPA 3.80 / 4.00
